

ADDENDUM XVII

TEST METHODOLOGY CODING

The following key should be referenced to identify the current test methodology information for the services listed in the Test List Section of this Directory. For those tests performed on-site, the code indicated in the Test List Method column corresponds with the code listed below. For those tests referred to other laboratories, methodology information has not been provided and an "R" is indicated in the Test List Method column.

CODE	METHODOLOGY	CODE	METHODOLOGY
1.	AAS - Atomic Absorption Spectrophotometry	21.	Enzyme Inhibition
2.	Agglutination	22.	Microfiltration Enzyme Immunoassay
3.	Alkali Denaturation	23.	Flame Photometry
4.	ASV - Anodic Stripping Voltametry	24.	Flow Cytometry
5.	Automated Cell Counter	25.	FEIA - Fluorometric Enzyme Immunoassay
6.	Calculation	26.	Fluorometry
7.	Cell Culture	27.	FPIA - Fluorescence Polarization Immunoassay
8.	Charcoal Flocculation	28.	Freezing Point Depression
9.	Chromogenic Substrate	29.	GC - Gas Chromatography
10.	Clot Detection	30.	Genetic Probe
11.	Colorimetric	31.	Genetic Probe with Amplification
12.	Column Chromatography	32.	Glass Bead Column
13.	Copper Reduction	33.	Gross
14.	Culture	34.	Guaiac
15.	Dipstick	35.	Hemagglutination
16.	Direct Fluorescent Antibody	36.	Hemolysis
17.	EIA - Enzyme Immunoassay	37.	HPLC - High Pressure Liquid Chromatography
18.	Electrophoresis	38.	IFA - Indirect Fluorescent Antibody
19.	ELISA - Enzyme-Linked Immunosorbent Assay	39.	Immunoassay
20.	Enzymatic	40.	Immuno-electrophoresis

ADDENDUM XVII (Continued)

TEST METHODOLOGY CODING

CODE	METHODOLOGY	CODE	METHODOLOGY
41.	Indirect Hemagglutination	64.	Simplate
42.	Ion Exchange Chromatography	65.	Solid Phase
43.	IRMA - Immunoradiometric Assay	66.	Solubility
44.	ISE - Ion-Selective Electrode	67.	Southern Blot
45.	Isoelectric Focusing	68.	Spectrophotometry
46.	Kinetic	69.	Stain
47.	Latex Agglutination	70.	Tissue Culture
48.	Mass Spectrometry	71.	Titration
49.	MEIA - Microparticle Enzyme Immunoassay	72.	TLC - Thin Layer Chromatography
50.	MIC - Minimal Inhibitory Concentration	73.	Turbidimetric
51.	Microcytotoxicity	74.	Viscosimetry
52.	Microscopy	75.	Westergren
53.	Multi-Channel Analyzer	76.	Western Blot
54.	Nephelometry	77.	Chemiluminescence
55.	Photo-optical Clot Detection	78.	Sequence Specific Amplification (SSP)
56.	Precipitation	79.	Reverse Sequence Specific Oligonucleotide Probes (SSOP)
57.	Radioassay	80.	Karyotyping
58.	RAST - Modified Radioallergosorbent Test	81.	RFLP-Restriction Fragment Length Polymorphism Analysis (DNA Finger Printing)
59.	Refractometry	82.	Direct Visual Observation
60.	RIA - Radioimmunoassay	83.	Gradient Diffusion
61.	RID - Radial Immunodiffusion	84.	SIA - Strip Immunoblot Assay
62.	SBT - Serum Bactericidal Test	85.	Aggregation
63.	Shell Vial Assay	86.	Line Blot Assay
		R.	Referral testing sent to outside lab. Contact AMC Special Chemistry at 262-3519 for further information.
