

Comprehensive Pelvic Health Care

Expert Pelvic Health Services in Albany and Clifton Park

Lara MacLachlan, MD

Elise De, MD

Mary-Elizabeth Moshier, NP

At Albany Medical Center, pelvic health specialists from the Department of Urology offer comprehensive care for patients with pelvic floor disorders affecting the bladder, reproductive organs, and bowel.

Our experts in urogynecology and reconstructive pelvic surgery diagnose and treat a wide range of conditions, including urinary and fecal incontinence, voiding dysfunction, neurogenic bladder, pelvic organ prolapse, fistulae, mesh complications, and urologic pelvic pain.

We offer a full spectrum of treatment options, from conservative therapies like pelvic floor physical therapy and pessary fitting to advanced surgical interventions (robotic, laparoscopic, or vaginal). Our team also provides specialized, minimally invasive options like Botox and neuromodulation (InterStim).

We welcome referrals for evaluation, second opinions, and collaborative care. Our team is committed to providing timely access for new patients and maintaining clear, open communication with referring clinicians, ensuring a collaborative approach throughout the continuum of care.

CONDITIONS

- Pelvic organ prolapse
- Urinary and fecal incontinence (stress, urgency, overflow)
- Overactive bladder (urgency, frequency, incontinence)
- Fistulae (urinary or rectovaginal)
- Bladder and pelvic pain (including interstitial cystitis)
- Neurogenic bladder
- Vaginal mesh complications
- Complex vulvar or perineal disorders
- Pelvic floor muscle dysfunction
- Recurrent urinary tract infections (UTIs)
- Vaginal or perineal scarring
- Vaginal stenosis or shortening
- Voiding dysfunction

TREATMENTS

- Reconstructive surgery for prolapse (robotic, laparoscopic, or vaginal)
- Surgical procedures, including slings, vaginal & robotic laparoscopic prolapse surgery, and native tissue repair
- Pessary fitting and management
- Minimally invasive urinary incontinence surgeries (e.g. injection bulking agents)
- Fecal incontinence treatment with Eclipse, surgery, and neuromodulation
- Full-service management of neurogenic bladder
- Botox, sacral neuromodulation, and behavioral therapies (e.g. overactive bladder)
- Multidisciplinary approach to pelvic pain, pelvic & vulvar conditions
- Pelvic floor physical therapy
- Cystoscopy
- Video urodynamic testing
- Urinary tract reconstruction (urethra, bladder, uterus)
- Repair of fistula & urethral diverticulum
- Treatment of mesh complications
