

# Comprehensive Endourology Care

## Minimally Invasive Management of Stones, Obstruction, and Complex Urinary Conditions

Mark White, MD

Anna Lees, NP

Endourology is a subspecialty of urology dedicated to the minimally invasive management of stone disease, urinary tract obstruction, and complex upper and lower urinary tract conditions. Utilizing advanced endoscopic and laser technologies—including ureteroscopy, percutaneous nephrolithotomy (PCNL), cystoscopy, and stent management—we provide precise diagnostic and therapeutic solutions for kidney stones, bladder outlet obstruction, ureteral pathology, and related disorders.

Our service offers prompt access, comprehensive evaluation, and streamlined procedural care with an emphasis on reduced morbidity and faster recovery. We prioritize clear communication, coordinated follow-up, and timely return of patients to your care to ensure a seamless and collaborative referral experience.

### CONDITIONS TREATED

- Bladder Outlet Obstruction
- Bladder Stones
- Benign Prostatic Hyperplasia (BPH)
- Hydroureter
- Incomplete Emptying Bladder
- Kidney Enlargement
- Kidney Obstruction
- Kidney Stones
- Lower Urinary Tract Symptoms (LUTS)
