

# Comprehensive Pediatric Urology Care

Coordinated, Expert Care for Children with Urinary and Reproductive Disorders

Alexandra Rehfuuss, MD

Emily Berguson, PA

Concetta Ferrari, NP

Albany Medical Center’s Pediatric Urology team specializes in diagnosing and treating children with congenital and acquired disorders of the kidneys, bladderw, and reproductive organs. Our specialists manage a wide range of conditions, including hydronephrosis, vesicoureteral reflux, kidney stones, hypospadias, undescended testes, voiding disorders, and hernias or hydroceles.

Using advanced surgical techniques, including open, laparoscopic, robotic, and endoscopic procedures, our team provides precise, minimally invasive interventions, bladder reconstruction, and fertility preservation when needed. We work closely with referring providers to ensure timely evaluation, coordinated care, and clear communication, helping children achieve optimal urinary and reproductive health.

## CONDITIONS TREATED

- Ano-rectal malformations
- Bedwetting
- Fertility preservation
- Hernias and hydroceles
- Hydronephrosis and kidney blockages
- Hypospadias
- Kidney stones
- Neurogenic bladder
