

Men's Reproductive Health

Your Partner for Complex Male Reproductive and Sexual Health Cases

Michael Pignanelli, MD

Charles Welliver Jr., MD

Jason Lee, PA

Brooke Maietta, NP

Our fellowship-trained andrology specialists provide comprehensive evaluation and treatment for male reproductive and sexual health conditions. We work closely with referring providers to deliver advanced diagnostic and therapeutic interventions for patients requiring specialized care.

We offer both medical and surgical management, with particular expertise in complex cases including refractory sexual dysfunction, advanced prosthetic surgery, male infertility evaluation, and hormone optimization. We emphasize a patient-centered approach that addresses the physical and psychological dimensions of sexual and reproductive health.

Clear communication and care coordination are central to our practice. We provide timely consultation reports, maintain open lines of communication throughout treatment, and ensure seamless transitions back to your care when appropriate. Urgent cases are prioritized, and we strive for efficient scheduling to serve your patients promptly.

CONDITIONS TREATED

- Andrology diagnoses
- Azoospermia
- BPH
